

CPT proposal letter

Hi Seas and ISO officer,

I'm very excited that I've been offered software development engineer (SED) intern employment at Amazon.

During this intern, my key responsibilities will be

- Collaborate with experienced cross-disciplinary Amazon engineers to conceive, design, and bring innovative products and services to market.
- Design and build innovative technologies in a large distributed computing environment, and help lead fundamental changes in the industry.
- Create solutions to run predictions on distributed systems with exposure to innovative technologies at incredible scale and speed.
- Build distributed storage, index, and query systems that are scalable, fault-tolerant, low cost, and easy to manage/use.
- Ability to design and code the right solutions starting with broadly defined problems.
- Work in an agile environment to deliver high-quality software.

As Amazon is a strong leader in computer science industry, I consider this training offer is directly related to my major field of study, Which is Computer Science. I believe this training will be a very good opportunity to push my computer science related skills to a new level.

Thanks,

Ruojia Zhang
